

Shown with adjustable overhead rail to align product for infeed.

## Rotary Product Table

### Description

The Rotary Product Table is the perfect answer for both your product infeed and collection needs. It is constructed with the same steel and stainless steel used in our line of labeling machines. The frame is finished with a durable stainless steel coating.

The Rotary Product Table is powered by a 1/8 hp variable speed DC motor. The separate on/off control button allows it to be complete independent from the other machines which make it a very versatile addition to any product line.

### Features

- Mild steel and stainless steel frame construction for durability and easy maintenance.
- Variable speed DC motor.
- Can be utilized to infeed or to accumulate product.

### Specifications

- 110 Volts, 3 amps
- 36", 42", or 48" diameters available
- Adjustable height from 32" to 34"  
Other heights available
